FOR IMMEDIATE RELEASE

Naanovo Energy Announces Distributorship Agreement with Mobile Power International

Ottawa, January 14, 2011: - Naanovo Energy Inc., the parent company for the Naanovo Group of Companies, announced today the signing of a Distributor Agreement between its UK based solar technology and supply subsidiary, Solar Maax Limited and New Jersey based Mobile Power International LLC (MPI). The Distributorship Agreement covers MPI's full line of mobile solar power and water purification systems, which utilize photovoltaic (PV) panels to produce electricity for direct use or for use in purifying water at remote off-grid locations, and is applicable to Africa and Asia.

MPI's mobile solar powered generators are rugged, reliable, pollution-free and cost effective. Single machines can deliver from 1,000 watts to 10,500 watts and can connect multiple machines up to 450,000 watts per hour of energy virtually anywhere the sun shines and works particularly well at construction sites, campsites, rural third world villages, or natural disaster relief areas. Similar systems configured for water purification can supply up to 180,000 gallons per day of potable water from fresh water, or 2,500 gallons per day from sea water, or 6,000 gallons per day from brackish water, and more if the machines are connected together. MPI's systems can be deployed in minutes to provide consistent power or water to meet off-grid needs cost effectively, with no noise, emissions or environmental impact.

About Solar Maax Limited

Solar Maax Limited is a wholly owned subsidiary of Naanovo Energy UK, Ltd, and a member of the Naanovo Group of Companies. Located in Portsmouth, England, Solar Maax Limited specializes in the marketing and distribution of solar power related products, such as parabolic troughs used to collect solar thermal energy in Concentrated Solar Power (CSP) plants, PV panels for commercial scale PV power plants, solar lighting and portable solar generators. Solar Maax Limited was created in 2009 to address the supply shortage of parabolic troughs in the market and has evolved to meet the solar power needs of underdeveloped regions in Africa, Asia and Latin America.

About Mobile Power International LLC (MPI)

Mobile Power International (“MPI”) was created in 2008 to solve two of the world’s most desperate but under-articulated needs – Power and Water. MPI’s mobile solar systems provide reliable and sustainable power, fresh drinking water, and agricultural water at an affordable price, while only using the power of the sun as an energy source. Based in Voorhees, New Jersey, MPI’s business objective is to take solar power and make it simple, affordable, and most of all, mobile. MPI designs, develops and manufactures mobile, reliable, and efficient machines that can provide inexpensive and environmentally friendly sources of energy, potable water and agricultural water. MPI’s systems have met the energy and water needs in emergencies, harsh environmental conditions, and/or remote locations across the world. MPI’s clients consist of governments, militaries, farmers, corporations, or non-profit NGO’s, but the application will be the same. The systems are extremely simple to use and maintain and are easily towed by a standard ½ ton truck.

About Naanovo Energy Inc.

Naanovo Energy Inc. is an Alberta, Canada, corporation, established in 2001 as an alternative energy technology company and has since transformed itself into a multinational CSP and Waste to Energy (WTE) project development company with subsidiaries and affiliated companies in the UK, the Gambia, Uganda, Nigeria, Guatemala, El Salvador, Brazil, South Africa, the UAE, the United States and Canada, all specializing in WTE and CSP projects.
